

## Tip #38: NEW HYDRAULIC FITTING SKUS – THE NEVERENDING STORY

The hard copy of the **ALL NEW, 2018 HYDRAULICS CATALOG** is now available via GBS – ContiTech's Collateral library site.

One thing you may not easily notice is that since the last major catalog revision in 2016, we have added well over 200 stocked fitting SKUs to our hydraulics line.

The new offerings include:

- 149 x SG- family, wire spiral hose fittings for XCPS, X-Life, constant pressure hoses
- 60 x B2- family, wire braid hose fittings
- 75 x Code 61 (FL), Code 62 (FH), and CAT (CF) flange fittings across multiple families
- 33 x British and German thread configurations across multiple families
- 27 x Hose Joiners (HJ) – **a completely new hose end offering**, across multiple families
- **Block 90** elbows with JIC threads – **also a new configuration**

So check out the new catalog, or contact your local CTM or Hydraulic Sales Specialist for your specific needs.

If you have any questions, please contact Chad Peters by phone, (276) 988-6809, or e-mail, [Chad.Peters.contitech.us](mailto:Chad.Peters.contitech.us)
