

## Tip 61 : Hydraulic Bin Label Program New Feature

Did you know that the Continental Hydraulic Bin Label Program has a new Search feature? The “Search” feature now makes it easy to look for Fittings, Adapters, and Hose labels with a search box within each of these 3 parts categories.

You can link to the Bin Label Program through [www.ContiFluidSolutions.com](http://www.ContiFluidSolutions.com) and select the Bin Label Icon. The Search box can be found under each product type (Fittings, Adapters, & Hoses) as shown below.

The screenshot shows the 'HYDRAULIC LABEL' interface. At the top, there is a navigation bar with 'ADAPTERS', 'FITTINGS', and 'HOSES' buttons. The 'FITTINGS' button is highlighted. Below the navigation bar, there are links for 'Download Offline Version' and 'Download Bin Label Instructions'. The main heading is 'Select Fittings'. Underneath, there is a dropdown menu for 'Choose Label Sample (Examples Below)' with 'SAP Number and Part Number (Industrial only)' selected. Below that, there are filter properties: 'Items: Show 10 items | UseHose: All | Activent Number starts with: All'. A search box is highlighted with a green circle and an arrow pointing to it. The search box contains the text 'Type here...' and has 'Go' and 'Reset' buttons. Below the search box, there is a table with columns: Quantity, Activent Number, SAP Number, Part Number, Use Hose, Use Hose Text, Picture, and UPC Code. The first row of the table shows 'Y4-0EFY90S-1216 (ORBS'.

Search via SAP Number, Part Number (Descriptive Number), or Activent Number.

This new feature makes creating new labels much faster for smaller searches and remember to use the “Upload” feature for creating a large number of labels. The “Upload” feature located at the bottom of the product type page. [Be sure to review the instructions for using the upload feature.](#)
