

## Tip #62: Hose Joiners Can Be Problem Solvers

For those times when...

- You need a hose repair for a long length hose assembly
- You have two short lengths of hose and have a long length requirement - right now
- You need an extended assembly but don't want to introduce a potential threaded leak point with a hose fitting/adaptor interface...
- You want a robust anchor point for complicated routing

Consider Continental's Hose Joiner (Continental's "HJ" thread description). A crimp-on solution with two hose end attachments

**Hose Joiner**

Available in the B2- (1-, and 2-wire braid hoses); SG (4-wire spiral hoses); and UC- (2-pc, Uni-Crimp stems) families. In sizes from -1/4" through 2" ID.

**B2-HJ-xxxx**

**SG-HJ-xxxx**

**UC-HJ-xxxx**

Reference your 2018 Continental Hydraulics Catalog for full information.
